EVENT 2025
APR. 1 > 3

DUNKERQUE - FRANCE

NOW & TOGETHER !
Let's shape the future

Don't miss this new event in the heart of the Battery Valley

We are delighted to welcome you to Dunkirk, France, from 1st to 3rd April 2025!

In addition to being at the heart of France's 1st automotive production region, Dunkirk is now positioned at three of the key stages in the battery value chain (materials preparation, battery manufacturing and recycling), particularly thanks to structuring industrial projects.

Our aim

To gather international, national and local players at the heart of one of Europe's leading regions for the battery industry

3 days to understand, meet and discuss all the issues involved in the emergence of this new industry.

We will focus on exiting challenges whilst covering a wide range of thrilling topics such as:

- Analysing industrial, regional and environmental issues,
- BtoB meetings between international, national and regional players,
- Supporting new business opportunities and start-ups,
- Initiating discussions with economic and social prospects,
- Defining skills and know-how requirements,
- Welcoming and integrating newcomers to the sector,
- Feedback on the location of industrial sites in the sector.

Why and for whom ?

Meetings between decision-makers to develop BtoB relations

To provide:

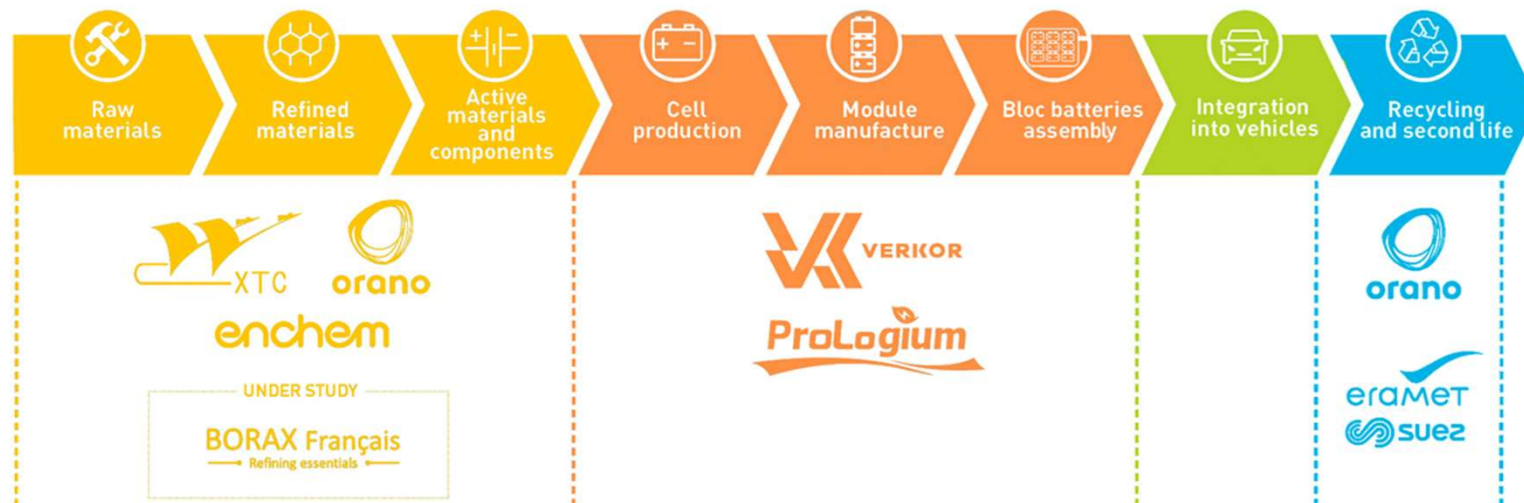

- **The European/global players** an opportunity **in the battery industry** discover the region and its assets, and to meet its players.
- **Project holders** an opportunity to develop relationships, attract international suppliers/partners, and meet local players
- **The local ecosystem** an opportunity to bring together regional economic and institutional players in the sector and all those who could invest in this new growth sector
- **Dunkirk's region** an opportunity to confirm its position as the leading player in the regional and European battery valley.

Why this event?

- An event **at the heart of the European Battery Valley**, the region's gigafactories and to find out more about the projects underway during exclusive visits.
- An event that contributes to the **development of the battery industry** and electric mobility.
- An event that structures the battery industry at the heart of Dunkirk's the region, by bringing together institutions, manufacturers, local and international players, and by contributing to the **development of public-private partnerships**.
